

## Embedding a Video in D2L

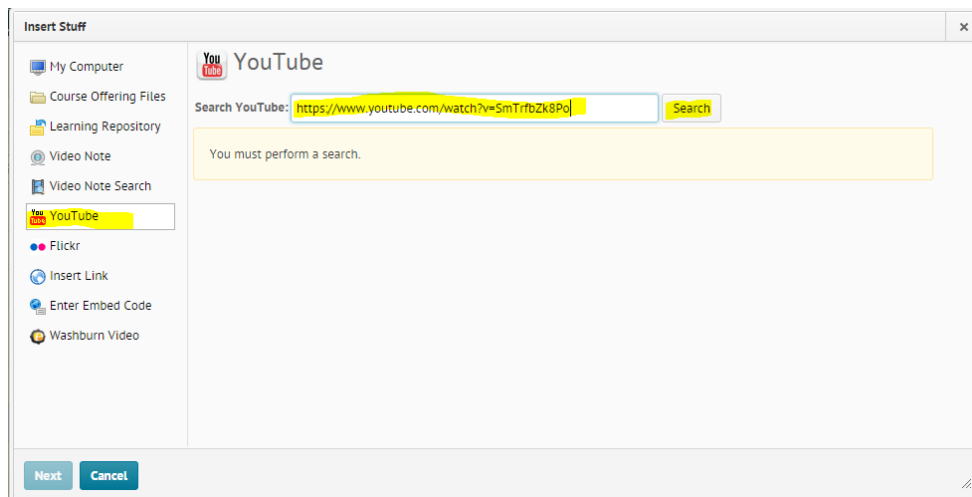

1. Navigate to where you want to embed the video.
2. You can embed the video any place you can type a description. If a description area is not available where you want it, add a sub-module. In the left-hand navigation, click on the name of the sub-module. You will now be able to edit the description field.

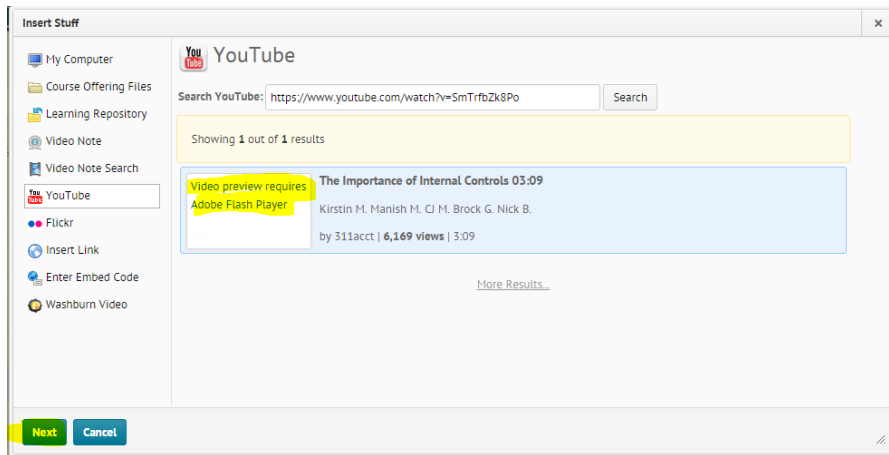

3. Click on the **Insert Stuff** icon.

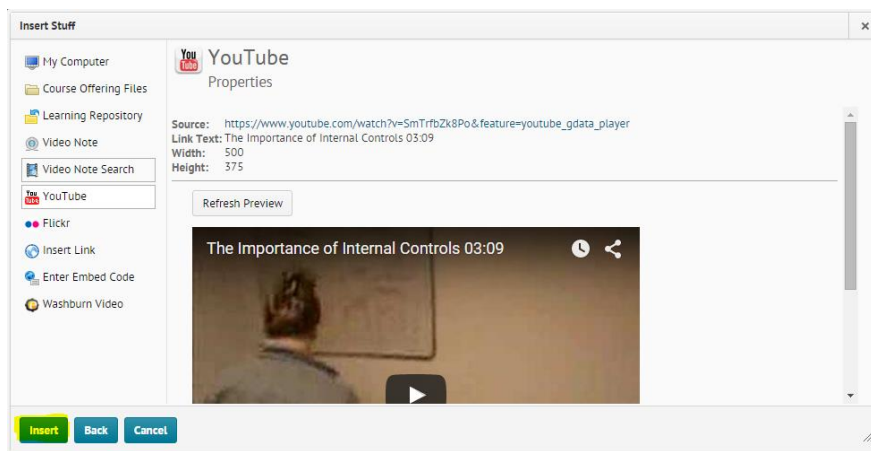

4. In the left-hand navigation, click on **YouTube**. Enter the **URL** of the video. Click on **Search**.

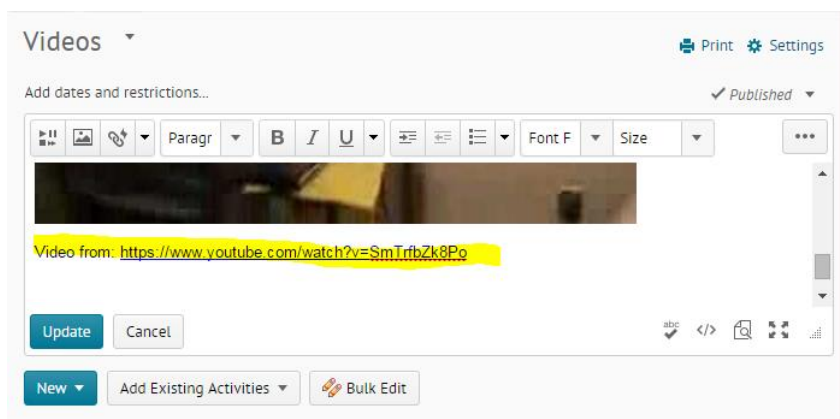

- Click on the thumbnail image of the video you want to select. Click on Next. (You may receive a warning message.)

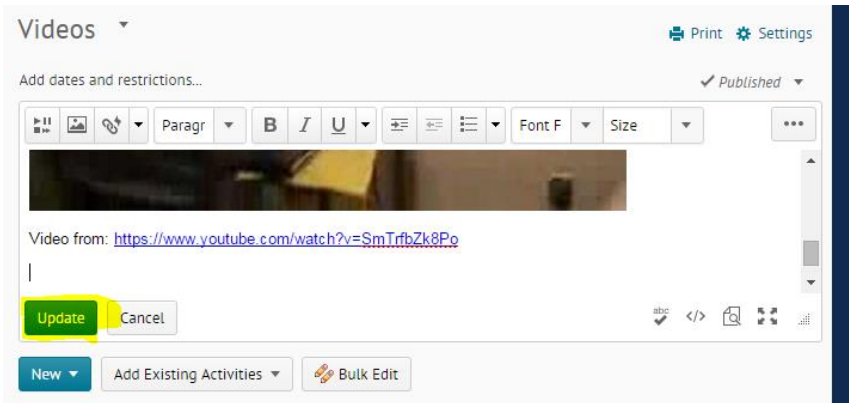

- The video is displayed. Click on Insert.

- It's best practice to cite the video by giving the actual link. Hit the Enter key. Type Video from:. Paste the URL of the video. Hit the Enter key.

8. Click on Update to save your changes.

9. The video is now embedded on the page.
